STORM DRAIN NOTES

- 1. Quantities shown are for information only and the City of Riverside is not responsible for their accuracy.
- 2. Construction shall be in accordance with City of Riverside Dept. of Public Works Standard Drawings, its supplemental notes and the Standard Specifications for Public Works Construction, Current Edition.
- 3. It shall be the responsibility of the contractor to clear the right of way in accordance with the provisions of law as it affects each utilities including irrigation lines and appurtenances and at no cost to the City.
- 4. Notice to contractor. The existence and location of any underground utility pipes or structures shown on these plans were obtained by a search of the available records. To the best of our knowledge there are no existing utilities exept as shown on these plans. The contractor is required to take precautionary measures to protect the utility lines shown and any other lines not of record or not shown on these plans.
- 5. The private engineer signing these plans is responsible for assuring the accuracy and acceptability of the work hereon. In the event of discrepancies arising during construction, the private engineer shall be responsible for determining an acceptable solution and revising the plans for approval by the City.
- 6. The contractor shall call in a locations request to UNDERGROUND SERVICE ALERT (USA), Phone No. 1-800-227-2600, two working days before digging No construction permit will be issued by the Public Works Department involving excavation for underground facilities unless the applicant has been provided an Inquiry Identification Number by U.S.A.
- 7. The developer shall be responsible for preserving or re—establishing and referencing survey monuments destroyed, disturbed or buried as a result of construction shown hereon.
- 8. All flagged elevations shall be staked in the field by the private engineer.
- 9. Contractor agrees that he shall assume sole and complete responsibility for job site conditions during the course of construction of this project, including safety of all persons and property; that this requirement shall apply continuously and not be limited to normal working hours; and that the contractor shall defend, indemnify and hold the owner and the engineer harmless from any and all liability, real or alleged, in connection with performance of work on this project, excepting for liability arising from the sole negligence of the owner or the engineer.
- 10. The concrete cover on the inside of all concrete pipe must be increased to provide a min. of 1.5" over the reinforcing when the design velocities exceed 20 fps. The concrete design strength in these reaches shall be: fc = 5000 psi. for velocities exceeding 20 fps. and fc = 6000 psi. for velocities exceeding 30 fps.
- 11. No person shall perform any construction activity or install any objects within the public rights-of-way or easements of the City of Riverside without a valid Construction Permit or, a Street Opening Permit or an Encroachment Permit issued by the City's Public Works Department.
- 12. Any traffic control striping obliterated and/or badly worn during construction shall be restored by the contractor within five days after notification from the City Inspectors.
- 13. On all areas within public right of way where the fill is one (1) foot or greater, a letter will be required from the soils engineer, certifying the compaction of the fill below subgrade, prior to issuance of the Construction Permit/Cut Sheets.
- 14. Construction work that will cause damage to the detector loop(s) shall not be performed until Traffic Signal Maintenance personnel have been notified (909-351-6096) and the necessary timing adjustments made to maintain signal
